

AutoCrib is delivering next generation industrial vending with VisiCab Object Recognition technology. This AMTB (automated tool box) is an excellent solution for FOD (foreign object debris) control but can be used in any application where 100% of the tools or other items must be returned and accounted for.

Any variety of tools can be housed in the trays of the VisiCab and THE MACHINE CAN ACTUALLY SEE which items are in the machine and which items are missing. It also knows who took them out and when.

VisiCab keeps tight control of critical tools in FOD control environments without the need for applying RFID tags or modifying tools. The system is far superior to other types of systems on the market that use optical sensors, RFID tags or weight based switches.

### HOW IT WORKS

**Login.** Employees access the VisiCab by using their employee badge or by entering their employee number. The access door will then open.

**Select Item.** Pressing the power button and forward/reverse button on the left and right of the machine simultaneously moves the trays. Users can quickly look through the trays and take all of the tools they need. (You can also search to find anything in the machine via touch screen.)

**Transaction.** Once the user closes the door the transaction is complete. The VisiCab will automatically scan all of the trays to identify and allocate the tools to whoever took them.

**Returns.** The return process is just like issues, except the user simply replaces the tools and closes the door to start the inventory process.

Instantly see that something is missing at a glance – The green indicator on the screen will turn yellow to provide visual notification that one or more tools are checked-out. The exact tools taken will be marked on the screen in red.

### FEATURES

- Available 24-7 - with security and accountability
- Does NOT use or need RFID tags
- No modifications of tools required
- Proprietary machine vision - actually sees inventory and knows what's missing
- Portable - with wheels and a fully charged battery move the VisiCab where you need it
- Battery life - in excess of 8 hours
- Compact footprint
- Built-in barcode scanner
- Tools are placed in foam cut-outs with high contrast background
- Know at a glance when items are taken - a green or yellow status indicator shows on-screen when the VisiCab is full (green) or if items are missing (yellow). You can also see the EXACT tools taken listed in red and WHO checked them out.
- 8 metal trays:
  - 4x trays
    - length 30 in. (762.0 mm)
    - width 12 in. (304.8 mm)
    - depth 4 in. (101.6 mm)
  - 4x trays
    - length 30 in. (762.0 mm)
    - width 12 in. (304.8 mm)
    - depth 2 in. (50.8 mm)
- 25 lb capacity each
- Enclosure:
  - width 40 in. (1,016.0 mm)
  - height 58 in. (1,473.2 mm)
  - depth 34 in. (863.6 mm)
- 12-month warranty

### SOFTWARE

- Over 200 standard reports
- AutoCrib.net or client-server - cloud managed services or secured internal network
- EDI - advanced ship notices (ASN) via EDI
- ERP system support - interface with many popular ERP systems (SAP, JDE, Baan, etc.)
- Alerts - get inventory alerts, and send email reports to any smartphone, tablet, or computer
- Seamlessly connect - use it with existing AutoCrib systems or use it as a standalone system
